Blockout Film

Blockout film is a specialized window film designed to block out light, providing total privacy and reducing heat from the sun.

It's ideal for rooms where you need to control light, such as bedrooms, offices, or media spaces.

This film also helps protect interiors from UV rays, reducing fading on furniture and flooring.

Can work with or without curtains and blinds.

SMART Film

Smart film is a versatile solution that transforms glass from clear to opaque with the flick of a switch.

It offers privacy on demand, allowing you to control visibility while still letting light through.

Ideal for offices, homes, or conference rooms, smart film can be easily applied to existing glass surfaces and can be switched between transparent and frosted for instant privacy.

POWER OFF

POWER ON

NANO Film

Nano film is designed to provide privacy by obscuring the view of LCD displays from certain angles.

It allows you to see through clearly while making screens appear dark or blacked out, offering discretion in sensitive environments like offices or meeting rooms.

The film is easy to apply, offering a secure visual space without compromising the look of windows or partitions.

SANDBLASTED

Sandblasted Film

Sandblasted film is a decorative and privacy-enhancing solution for glass surfaces.

It mimics the look of sandblasted glass, offering a frosted appearance that diffuses light while still allowing it to pass through.

Ideal for offices, homes, and commercial spaces, this film provides an elegant way to maintain privacy without compromising natural light.

FROSTED Film

Frosted film is a versatile solution for adding privacy to glass surfaces without blocking natural light.

It creates a soft, opaque finish that works well for windows, doors or partitions.

Whether for homes or offices, frosted film offers a stylish way to maintain privacy while still enjoying an open, bright space.
